

Uni-Par UP-1

c **UL** US
LISTED
"Damp Location"

The first professional par 64 stage lighting fixture made of high temperature polymeric materials makes this the lightest, most advanced par fixture in the world. This patented stage lighting fixture is made of high impact, high temperature, engineered plastics. These are the same materials used in new airplanes and even the space program. It can use Par 64 or Par 56 lamps without modification. Lamps are installed through the front of the housing. Standard gel frame size for use with barn doors or other accessories. Only the highest quality parts made of Engineered Thermoplastic and Stainless Steel are used for the UP-1 making them virtually weather-proof and the best product that money can buy!

THERE CAN BE ONLY ONE...
